EQUIPMENT

Discover the future now - *the first carbon office chair in the world*

The ultrathin backrest made of the extremely hard material carbon gives the W5 a delicate and light appearance

The backrest, consisting of a high-tech 3D knit mesh, is only suspended on six points and stretched over the backrest. In this way, the backrest optimally adjusts to the user, but in no way restricts its mobility

Seat available in many different colours

Synchro mechanism with tension adjustment by lateral handwheel (approx. user weight 40 - 110 kg),
synchro ratio of backrest to seat = 3 : 1;
inclination of backrest: approx. 0° - 23°,
height-, seat depth- and backrest inclination adjustment via Bowden cable system (pushbuttons are integrated in the seat plate)

Incl. Dondola seat joint

Polished aluminium design base

Equipped with braked double-wheel safety castors suitable for carpet floors
